Database Design and Development

Topic 2:
Enhancing Design (1)

V1.0 © NCC Education Limited

Enhancing Design (1) Topic 2 - 2.2

Scope and Coverage

This topic will cover:

- Introduction to normalisation
- The concept of functional dependency
- Data redundancy and update anomalies
- Overcoming anomalies with normalisation

Bringing British Education to You
www.nccedu.com

V1.0 © NCC Education Limited

Enhancing Design (1) Topic 2 - 2.3

Learning Outcomes

By the end of this topic students will be able to:

- Explain the reason why the process of normalisation is carried out
- Normalise a document to third normal form

Bringing British Education to You
www.nccedu.com

V1.0 © NCC Education Limited

Enhancing Design (1) Topic 2 - 2.4

Some Key Concepts

- Relational integrity
- Nulls
- Entity integrity
- Referential integrity
- General constraints

V1.0 NCC Bringing British Education to You www.nccedu.com © NCC Education Limited

Enhancing Design (1) Topic 2 - 2.5

Question

- Why cannot any part of a primary key be null?

?

V1.0 NCC Bringing British Education to You www.nccedu.com © NCC Education Limited

Enhancing Design (1) Topic 2 - 2.6

Answer

- Because a null value, being unknown, might be the same as the value in the primary key of another tuple.

V1.0 NCC Bringing British Education to You www.nccedu.com © NCC Education Limited

Enhancing Design (1) Topic 2 - 2.7

Properties of a Relation

- Relation Named
- Atomic values in cells
- Attribute Named
- Attribute value drawn from a domain
- No duplicate tuples (rows)
- No significance to order of tuples
- No significance to order of attributes

V1.0  Bringing British Education to You www.nccedu.com © NCC Education Limited

Enhancing Design (1) Topic 2 - 2.8

Functional Dependence - 1

- $A \rightarrow B$
- This is the notation
- If we know the value of A then we will know the value of B

V1.0  Bringing British Education to You www.nccedu.com © NCC Education Limited

Enhancing Design (1) Topic 2 - 2.9

Functional Dependence - 2

- $StudentID \rightarrow StudentName$

StudentID	StudentName
23	Singh
34	Smith
56	Smith
76	Singh

V1.0  Bringing British Education to You www.nccedu.com © NCC Education Limited

Enhancing Design (1) Topic 2 - 2.10

Super-keys, Candidate Keys, Primary Keys - 1

StudentID	Activity	Cost
21	Dancing	\$23
21	Swimming	\$50
34	Dancing	\$23
55	Fencing	\$20

Bring British Education to You
www.nccedu.com

© NCC Education Limited

Enhancing Design (1) Topic 2 - 2.11

Super-keys, Candidate Keys, Primary Keys - 2

StudentID	Activity	Cost
21	Dancing	\$23
21	Swimming	\$50
34	Dancing	\$23
55	Fencing	\$20

Activity → Cost

No other dependencies

Would need all the attributes to be a primary key

Bring British Education to You

Enhancing Design (1) Topic 2 - 2.12

Deletion and Update Anomalies

What happens if we change the price of Dancing?

StudentID	Activity	Cost
21	Dancing	\$23
21	Swimming	\$50
34	Dancing	\$23
55	Fencing	\$20

What happens if we delete this row?

Bring British Education to You

Enhancing Design (1) Topic 2 - 2.13

Splitting the Relation

StudentID	Activity	Cost
21	Dancing	\$23
21	Swimming	\$50
34	Dancing	\$23
55	Fencing	\$20

StudentID	Activity
21	Dancing
21	Swimming
34	Dancing
55	Fencing

Activity	Cost
Dancing	\$23
Swimming	\$50
Fencing	\$20

Supplier

V1.0 Bringing British Education to You www.nccedu.com © NCC Education Limited

Enhancing Design (1) Topic 2 - 2.21

Normalisation and Semantics - 1

- Normalisation depends on understanding the **meaning** of the data.
- For example the price of an item depends on just the item. If the same item could be supplied by different suppliers at different prices then the normalisation would look different. **How?**

V1.0 Bringing British Education to You www.nccedu.com © NCC Education Limited

Enhancing Design (1) Topic 2 - 2.22

Normalisation and Semantics - 2

- **Answer:** there would be a separate group of attributes with the primary key of Supplier Number and Item Number. Price would be functionally dependent on both of these attributes and would therefore be an attribute of this entity.

V1.0  Bringing British Education to You www.nccedu.com © NCC Education Limited

Enhancing Design (1) Topic 2 - 2.23

Extended Example

- To be used throughout the course
- Lots of different documents might be examined e.g.
 - Customer records
 - Sales sheets
 - Receipts and invoices

Marlowe Interiors - 2

Marlowe Interiors
 1 Newington Green Road
 London
 N1 7YJ
 020 7888 1234
 Job: Kitchen Makeover
 Customer: Ivan Jones, 2 Digby Mansions, Highbury Park
 Area: London North
 Date: 02/03/00

Parts
 1 sink, tin @ 130.00 including VAT.
 1 u-pipe @ 20.00 ditto
 3 x assorted plumbing fittings @ 33.00 total including VAT
 1 thermostat @ 100.00 including VAT

Labour
 Plumber 3 hours £150
 Labourer 3 hours £60
 Electrician 1 hour £50 (to fit thermostat)

TOTAL PARTS £283.00
 TOTAL LABOUR £260.00
 TOTAL £543.00

Enhancing Design (1) Topic 2 - 2.27

Self Study

- You will be asked to normalise this document.

V1.0  Bringing British Education to You www.nccedu.com © NCC Education Limited

Enhancing Design (1) Topic 2 - 2.28

Learning Outcomes

By the end of this unit students will be able to:

- Explain the reason why the process of normalisation is carried out
- Normalise a document to third normal form

Have we met them?
